Overview

Wi-Tek Industrial 1.25G SFP transceiver modules are introduced to extend transferring distance up to 20km, which meets the distance demand for LAN. With built-in digital diagnostic monitoring, it allows access to real-time operating parameters. They are built to withstand harsh climate with temperature from -40℃ to 85℃, which ensures normal operation in various environment. Users choose the SFP transceiver module based on the real demands.

Features

- Plug and Play, Zero Configuration
- Hot Pluggable
- Digital Diagnostic Monitoring for Strong Diagnostic Capabilities
- High Compatibility
- Lower Power Consumption Less Than 1W
- Withstand Harsh Environment with Temperature -40℃~85℃ (-40℉~185℉)
